

Dear Valued Guest,

We hope you are enjoying your time onboard **Star Princess**.

Please be advised that we will begin replenishing our **liquefied natural gas (LNG)** supply on the morning of **31ST May 2026** in **Seattle**.

To comply with local regulations and onboard safety protocols, the following measures will be in effect starting at approximately **6:30am**:

- Guests in **Starboard side staterooms** are kindly asked to refrain from using their balconies.
- Guests will not be permitted to smoke anywhere onboard.
- For all guests who wish to smoke, designated smoking is available in the employee parking lot (Lot B). For your convenience, a complimentary shuttle service operates continuously.

Guests may board the shuttle directly in front of the cruise ship terminal. Shuttle service is available upon arrival, once arrival clearance has been granted, and continues until sailing. The shuttle ride to Lot B takes approximately one to two minutes.

Our terminal team will be pleased to assist with directions or answer any questions you may have.

- Please avoid using **mobile phones or cameras** near the bunkering area.

An announcement will be made from the Bridge once fueling is complete.

The health and safety of our guests and crew remain our highest priority. We appreciate your understanding and apologize for any inconvenience this may cause.

If you have any questions, please contact **Guest Services** via **Crew Call™ Chat** on your **Princess® App** or by dialing **6000**.

Your Guest Services Team
